These documents provide a little information about alternatives. I don't have anything more descriptive.

EA Alt Array 8-2-11.pdf is a table with the names and v. brief description of the alternative.

May_12_2009_Restoration_Actionspdf is a table with the restoration projects in BDCP. It's old.

REVISED DRAFT presentationppt is a file with a presentation about alternatives from 2010. it is also dated at this point.

All the word files contain a little bit more information about operations for each of the alternatives. The name of the file identifies the alternative it addresses.

Could be -- that is called the 'proposed project' in that material, but could the 'preliminary proposal' be the package of environmental actions, that the BDCP is proposing -- Yolo Bypass work, habitat restoration, bubbler in the Stockton ship channel etc. with the plumbing change? In the draft flows package they were 'evaluating' such things all together.

Bruce - Wouldn't that be the preferred BDCP alternative? The 15,000 cfs tunnel, dual conveyance, 5 intakes with the ops as described in the material DWR sent earlier today?

Hi-

So, I opened up the toxins draft and took a peek. I can generally review the methodology but knowing more of the substance of the 'preliminary proposal' that defines conditions being evaluated would make me a lot happier. Any clue as to what this proposal is? Bruce doesn't know....
